

Name _____

Understand Volume

Essential Question How can you use unit cubes to find the volume of a rectangular prism?

Measurement and Data—
5.MD.3b, 5.MD.4

MATHEMATICAL PRACTICES
MP.3, MP.5, MP.6

Investigate

CONNECT You can find the volume of a rectangular prism by counting unit cubes. **Volume** is the measure of the amount of space a solid figure occupies and is measured in **cubic units**. Each unit cube has a volume of 1 cubic unit.

The rectangular prism above is made up of _____ unit cubes and has a volume of _____ cubic units.

Materials ■ rectangular prism net A ■ centimeter cubes

A. Cut out, fold, and tape the net to form a rectangular prism.

B. Use centimeter cubes to fill the base of the rectangular prism without gaps or overlaps. Each centimeter cube has a length, width, and height of 1 centimeter and a volume of 1 cubic centimeter.

- How many centimeter cubes make up the length of the first layer? the width? the height?

length: _____ width: _____ height: _____

- How many centimeter cubes are used to fill the base? _____

C. Continue filling the rectangular prism, layer by layer. Count the number of centimeter cubes used for each layer.

- How many centimeter cubes are in each layer? _____
- How many layers of cubes fill the rectangular prism? _____
- How many centimeter cubes fill the prism? _____

So, the volume of the rectangular prism is _____ cubic centimeters.

Draw Conclusions

- Describe the relationship among the number of centimeter cubes you used to fill each layer, the number of layers, and the volume of the prism.

- MATHEMATICAL PRACTICE 3** **Apply** If you had a rectangular prism that had a length of 3 units, a width of 4 units, and a height of 2 units, how many unit cubes would you need for each layer? How many unit cubes would you need to fill the rectangular prism?

Make Connections

To find the volume of three-dimensional figures, you measure in three directions. For a rectangular prism, you measure its length, width, and height. Volume is measured using cubic units, such as cu cm, cu in., or cu ft.

- Which has a greater volume, 1 cu cm or 1 cu in.? Explain.

Find the volume of the prism if each cube represents 1 cu cm, 1 cu in., and 1 cu ft.

- MATHEMATICAL PRACTICE 6** Would the prism above be the same size if it were built with centimeter cubes, inch cubes, or foot cubes? **Explain.**

Name _____

Share and Show

Use the unit given. Find the volume.

1.

Each cube = 1 cu cm

Volume = _____ cu _____

3.

Each cube = 1 cu ft

Volume = _____ cu _____

2.

Each cube = 1 cu in.

Volume = _____ cu _____

4.

Each cube = 1 cu in.

Volume = _____ cu _____

Compare the volumes. Write $<$, $>$, or $=$.

5.

Each cube = 1 cu cm

Each cube = 1 cu in.

_____ cu cm ○ _____ cu in.

6.

Each cube = 1 cu ft

Each cube = 1 cu ft

_____ cu ft ○ _____ cu ft
